The screenshot shows the EndNote web interface. At the top, there is a navigation bar with the Clarivate Analytics logo and a menu with options: EndNote™ basic, My References, Collect, Organize, Format, Match, Options, and Downloads. The main content area is titled 'Getting Started' and features three columns of information:

- Find:** Includes a 'Quick Search' box with a search input field, a dropdown menu set to 'All My References', and a 'Search' button. Below this is a 'My References' section with links to 'All My References (0)', '[Unfiled] (0)', 'Quick List (0)', 'Trash (0)', and 'My Groups'. A 'ResearcherID' badge is also visible.
- Store & Share:** Describes the 'Collect' process: 'Collect references by searching online databases or importing your existing collection.' It lists: 'Search an online database', 'Create a reference manually', 'Import references', and 'Find your best potential journal' (with a 'NEW' tag).
- Create:** Describes the 'Organize' process: 'Organize and group references in any way that works for you. Then share your groups with colleagues.' It lists: 'Create a new group', 'Share a group', and 'Find duplicate references'. The 'Create' section describes the 'Format' process: 'Use our plugin to format bibliographies and cite references while you write.' It lists: 'Cite While You Write™ Plug-In', 'Create a formatted bibliography', and 'Format a paper'.

A 'Hide Getting Started Guide' link is located in the top right corner of the main content area.

This article focuses on understanding the Americans with Disabilities Act and developmental disabilities for health care providers in special care dentistry. Essential to this awareness is a comprehension of statutory and regulatory requirements and how state disability acts can be more rigorous in application. Developmental disabilities are re-examined in the context of the *Diagnostic and Statistical Manual of Mental Disorders* (Fifth Edition). Understanding of intellectual disability, epilepsy, autism spectrum disorder, and cerebral palsy is necessary because the management of oral health considerations for special care patients has become ever more complex and indispensable.
